### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **Part III DETAILED ACTION**

1. Applicant should update the cross reference information on page 1 of the specification to reflect that application has been issued.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 21,26,27 and 28 are rejected under 35 U.S.C. 102(e) as being anticipated by Shiota (6,169,596).

With regard to claim 21, Shiota teaches a data communication apparatus (see fig. 1) connected to an image storage apparatus (3) via a network (abstract), said communication apparatus comprising: reception means (5) for receiving a print request ID information identifying an image and an actual print size of the image to be printed (e.g. col. 1, line 44 thru col. 2, line 39); acquisition means (9) for, if the print request includes a plurality of actual print sizes for the same ID information, requesting one of the plurality of actual print sizes from the image storage apparatus via the network and acquiring image data having the requested actual print size from the image storage

apparatus (e.g. col. 1, line 44 thru col. 2, line 39); and generating means (4) for generating print information corresponding to each of the plurality of actual print sizes using the acquired image data (see fig. 1 and e.g. col. 3, lines 15-55).

With regard to claims 26 and 27, the limitations of claims 26 and 27 are covered by the limitations of claim 1 above. The computer code and steps of claims 26 and 27 are covered by the means and functions of claim 1.

With regard to claims 28, the limitations of claim 28 are covered by the limitations of claim 1 above; (e.g. the center server reads on the image storage of claim 1, the resolution reads on the print size of claim 1).

### ***Conclusion***

3. Claims 22-25 and 29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ohtsuka (6,327,049) teaches an order information recording medium and order file generating apparatus for photographic service.

Fujita et al. (6,007,261) teaches a printing system with means to extract data type before printing on a recording medium.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gabriel I. Garcia whose telephone number is (571) 272-7434. The Examiner can normally be reached Monday-Thursday from 7:30 AM-6:00 PM. The fax phone number for this group is 571-273-8300.

**CENTRALIZED DELIVERY POLICY:** For patent related correspondence, hand carry deliveries must be made to the Customer Service Window (now located at the Randolph Building, 401 Dulany Street, Alexandria, VA 22314), and facsimile transmissions must be sent to the Central FAX number, unless an exception applies. For example, if the examiner has rejected claims in a regular U.S. patent application, and the reply to the examiner's Office action is desired to be transmitted by facsimile rather than mailed, the reply must be sent to the Central FAX Number.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (571) 272-2600.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (**PAIR**) system Status information for published applications may be obtained from either Private **PAIR** or Public **PAIR**. Status information for unpublished applications is available through Private **PAIR** only. For more information about the **PAIR** system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private **PAIR** system, contact the Electronic Business Center (**EBC**) at 866-217-9197 (toll-free).
